The following is an examiner's statement of reasons for allowance: Komatsu et al, U.S. 4,083,834, is the closest prior art of record. This reference discloses the production of polymers terminated with an oxygen or a sulfur which is coupled to lithium. There is no suggestion, however to couple these sulfur terminated polymers to a species with an oxidation state greater than 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
